Chief Operations Officer

Griffin

Nyeri, Kenya

November 3, 2025

Dear Hiring Manager,

I am writing to express my keen interest in the Quality Analyst position at Griffin. My fascination with how systems work, more importantly, what happens when they fail, has guided my journey into software quality assurance. This curiosity inspired me to explore how systems can be made more reliable and perform better, eventually leading me to train as a QA & QE Trainee at Teach2Give.

During my time at Teach2Give, I have gained experience in manual and integration testing, API testing using Postman, and SQL querying. I also use Jira daily to manage and track project workflows within Agile and Scrum frameworks in a Bug Tracking System project we are working on in a team of four people. These experiences have strengthened my ability to detect issues early, improve software quality, and communicate effectively across development teams.

My visits to Griffin's Nyeri offices left a lasting impression; the scenery, the energy, and the sense of innovation stood out to me. I am drawn to Griffin not only for its commitment to quality but also for the environment it fosters for growth and collaboration. Joining your QA team would allow me to contribute my analytical mindset, technical skills, and passion for dependable systems to your mission.

I would be thrilled to discuss how my background aligns with Griffin's vision for quality assurance excellence. Thank you for considering my application.

Warm regards,

Karanja David Waiganjo
